

Marching to a Satanic Drummer

(October 4, 2023)

There are a plethora of things happening causing many to focus away from actual problems facing global society. With Trump entrenched in the court systems due to indictments against him, the media circus is going full steam. This of course, is designed to keep Trump off the ballot for next November and also to keep the average person from noticing what globalists are doing behind the scenes through global agencies like The WHO (World Health Organization) and The Federal Reserve etc..

Sasha Latypova, recently interviewed by Dr. Jane Ruby[1], is a pharma whistleblower who understands what goes on in that industry and she warns us that if we focus primarily on the Trump v Biden presidential race next November, we will miss most or all of what WEF globalists are attempting put into place now.

Of course, the media also dutifully ignores or denies any negative connotations related to the COVID pandemic, the jab, globalists themselves, and the globalist UN machine, while officially supporting "climate change" and the alleged over abundance of *carbon*. Globalists will continue pushing and will count on continuing media cover, since most media is owned by oligarchs. We can expect another pandemic that they hope will serve to redirect everyone's attention away from the pharmaceutical issues and the actual disinformation provided continually by our own governments. Let's also remind ourselves that above all things, Ukraine *must* be supported with *billions* of American dollars while we have an open border allowing all sorts of criminals and spies into the United States. Interesting how treason today is safely out in the open. Oh, and then there's the global economy that's not looking good at all with constant warnings of a severe recession/depression occurring in the near future. [2]

Dr. Naomi Wolf provides a brief highlight from her upcoming book, *Facing the Beast: Courage, Faith and Resistance in a New Dark Age*. [3] The book offers some insight into the past three years of her life and what she's gained from all of it, including the actual revolution that seems to be going on quietly behind the scenes by heroic people from all walks of life to put down the coming "beast" world system. This "beast" - whether she fully understands it or not - is the creation of the final human-led global government, which will, in fact, be ruled by Satan's spiritual son, Antichrist, the son of perdition who will rise from the pit at some point during the coming Tribulation period.

Of course, as noted, the media largely ignores all of what is actually going on (by highlighting only the "acceptable," or sanctioned narrative). Governments and their agencies, along with the military, hospitals and so-called health professionals are doing the same. They all seem to be in deliberate denial about the

problems associated with the modRNA jab. In fact, the kinds of things I'm reading about are unsettling because it means that people *deliberately* lied about things related to the virus and the jab. If the information I'm reading is true, they *continue* lying. Why? In essence, they *must* because if they started telling the truth, people would string them up on the gallows or the nearest tree. Evil must protect itself at all costs, though it wouldn't surprise me if they decide to throw Fauci under the bus to distract the world from the people (globalists) behind the curtain and reduce pressure from themselves.

Official government mouthpieces previously told us that the mRNA jab would only remain in your body for a short period of time. But that was a complete lie according to new data. In fact, we now know the jab contains actual *DNA*, not just RNA. A recent article written by Dr. Ah Khan Syed highlights this fact and its inherent dangers. [4] The article, *Plasmid DNA in Pfizer and Moderna injections can enter the nucleus of our cells in 5 different ways*, informs us that DNA is included in the mRNA jab at roughly 30% and then notes that it can clearly gain entrance into the nucleus of our cells. Once there, that DNA remains *permanently* and creates all sorts of health problems, including "turbo" cancers. Please read the linked article.

Dr. Joseph Mercola discusses the same problem regarding DNA in the jab in his article, *Alarming COVID Jab Contamination Shocks Scientists*. [5] This is a *huge* problem that many continue ignoring while pushing the jab. I'm sure Fauci is preparing a statement right now that explains the presence of DNA away and minimizes the harm.

Here are more revelations, several of which are very disturbing things related to the aftereffects of the CV jab. [6] But if you have a problem taking the CV jab, no worries, because they've nearly perfected a way to disperse it through the air and you can simply breathe it in, [7] not to mention putting it in some of the foods we eat.

Added to all of this, it appears beyond a reasonable doubt that Moderna actually *created* the COVID-19 "virus." [8] The linked article may leave you flabbergasted. Gain of function *was* used to increase the chances of the virus jumping to humans and the question is *why*?

If everything the author notes in the article is true, it is completely mind-blowing. The virus that caused COVID and allegedly jumped from a bat to people in Wuhan, China has *never existed in nature* before and, according to the article, never will because of the math involved. It's essentially impossible for that to occur in nature (and the author fully explains why). Highlighting the actual patents involved and awarded to Moderna (years ago), the COVID "virus" was something explicitly created in the lab, funded by Fauci's NIH, with gain of function used. The question is was it *accidentally* or *deliberately* released? Hegelian Dialectic in play here? Moderna has the patents to prove they created it and through gain of function, the threat of harm to people was greatly increased.

Folks, the people behind all of this are given over to evil. They march to a satanic drummer. Why take the time to see *if* they can make an animal virus jump to human beings at all? What's the point if it's not to *kill* people or at the very least, make them want a "vaccine" that was said to destroy said virus (even though it did *not* do that), in order to *enrich* - \$\$\$ - pharma companies?

Warning: Graphic description ahead!

But the ongoing satanic evil is not simply relegated to one area of "science." I just watched a video (from the 1940's), of a dog in a lab. Actually, it was just the dog's *head*, laying on a table (without its body), hooked up to a machine that pumped/circulated artificial blood into the head and drained off the venous blood, continually recycling it. The experiments on the dog's head included seeing if it would react to light, sound, taste and other stimuli. It reacted to all of it with open blinking eyes, even licking its lips repeatedly after tasting citrus acid. Folks, we are talking about a dog's HEAD with no body at all! We can only hope it was not self-aware! I apologize if this scenario angers you (as it does me), but evil pervaded society way back and has simply gotten more brazen and out in the open since. Perpetrators seem to have little to fear from society even when society finds out about their Frankenstein-like experiments. I suppose it's "fine" if the person torturing an animal wears a white lab coat, though someone on the streets doing the same thing would be arrested for cruelty to animals. This is the stuff Hitler's Mengele would be absolutely *proud* of sanctioning.

There is nothing good that comes from experimenting on the live head of a dog! If this happened in the 1940's, what disgusting things have they been working on *since* then?? We know only a few things that leaked out about Fauci's experiments with beagles. Frankly, I have no idea how any so-called scientist can participate in such inhumane experiments in the first place, but apparently they follow the *money*. The narrator of the video has one of those "happy" voices often employed to do voice overs for news reel footage played in movie theaters before the main movie started decades ago as though he's simply describing cooking a four-course meal. There could be terrible scenes on the screen for viewers, but the narrator adjusts the tone with a slightly upbeat and somewhat entertaining voice in the midst of the turmoil. He seemed almost jocular in pointing out the dog's head would "live" for hours on the table. I've done quite a bit of paid voice over but there were a lot of things I would not do. Not sure how any voice over person would be willing to provide voice to that evil. Oh wait, it's all about money, first and last.

These experiments are likely the type of thing that occurred during the days of Noah, (without modern technology but created with secret knowledge/gnosis from demons). God got so sick of what was happening to His Creation, He had no choice but to destroy all of civilization (and most animals), and start over with Noah and family as well as the animals he carried with him on the ark.

Even *if* globalists could find a way to extend their physical lives by experimenting on animals like above using the excuse of seeking eternal physical life through *transhumanism*, our Lord's physical return one day *will* halt their progress and judge *them* as He will judge all the nations and end their experimentation. It will also effectively end their *physical* "longevity." Now, however, they are blindly content to believe that either God does not exist or He's no match for their god, Lucifer. What a horribly tragic awakening they are destined to experience when He comes in the clouds.

Folks, just like Daniel and his three friends, we must determine ahead of time that at every turn, we will seek to follow our Lord and refuse to compromise with the world as it continues to sink into the sewer, trying to drag us down with it, no matter how small or large the compromise would be. Things are not going to get better or more spiritual (until our Lord returns), in spite of the fact that there are so many

within Christendom now claiming that things *will* improve. The Bible says very clearly that as the human-led age comes to a close, destroyed by our returning Lord, things will heat up, more wars will break out, people will turn against one another and essentially, the world will go crazy openly embracing evil. Here is one example from Paul in **1 Timothy 4:1-3** NIV.

1 The Spirit clearly says that in later times some will abandon the faith and follow deceiving spirits and things taught by demons. 2 Such teachings come through hypocritical liars, whose consciences have been seared as with a hot iron. 3 They forbid people to marry and order them to abstain from certain foods, which God created to be received with thanksgiving by those who believe and who know the truth.

Yes, we have people abandoning the faith seemingly in droves and some are fairly high-profile leaders within Christendom. Others have not left physically but have left solid *teaching*, to embrace and teach heresy. Too many in the congregations are also embracing those lies.

Food? We hear globalists and their puppets advocating that we *must* stop eating actual meat for fake meat because of the alleged "carbon" footprint of cows and to help mitigate "climate change." God gave us all the beasts of the field back in Genesis for our food.

In a second letter to Timothy, Paul provides more insight; **2 Timothy 3:1-5** NKJV.

1 But know this, that in the last days perilous times will come: 2 For men will be lovers of themselves, lovers of money, boasters, proud, blasphemers, disobedient to parents, unthankful, unholy, 3 unloving, unforgiving, slanderers, without self-control, brutal, despisers of good, 4 traitors, headstrong, haughty, lovers of pleasure rather than lovers of God, 5 having a form of godliness but denying its power. And from such people turn away!

The perilous times Paul refers to are here. Much of what globalists want is being pushed from behind the scenes although much is coming out into the open due to their arrogance.

As Christians, do we cave out of fear? Do we cower? Do we toss in the towel? No, we do what Daniel and his three friends did as well as many others throughout Scripture. We submit ourselves to God and trust in His ability to save us and carry us through the storms in spite of what lies ahead. We don't need to be violent or act like the world. We *can* be like Daniel if we choose and we do need to actively choose God's way. By doing nothing we choose the world (Satan).

Teach me your way, O LORD; I will walk in Your truth. Unite my heart to fear Your Name.
(Psalm 86:11)
