

## Under the Influence

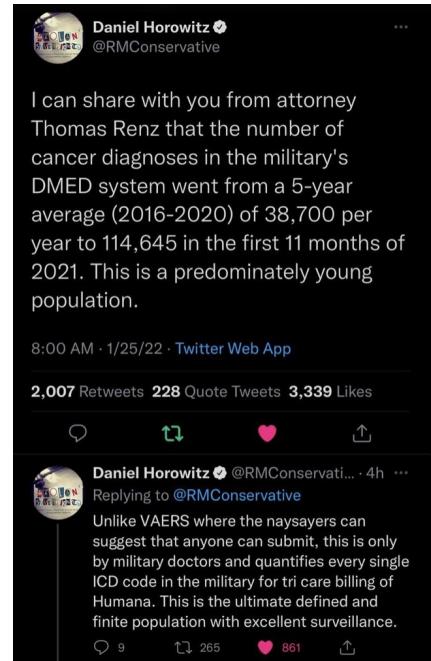

(January 26, 2022)

Recently, the phrase "[mass formation psychosis](#)" has been offered as the reason why so many in society appear so willing to give their allegiance to Fauci, a shill for Big Pharma. Dr. Mattias Desmet is the person credited with discussing this problem, which Dr. Robert Malone has also highlighted. No worries though, because the [MSM believes they have "discredited" it](#). Problem is that the notion of mass "hypnosis" or mass formation psychosis truly does exist and it's been used in history many times, though it wasn't necessarily called that. Society is absolutely under the influence of something that has directed their thoughts, their actions, and their fears causing many to do what they would not normally do under other circumstances where diseases are concerned. Psychologists have been studying the effects of certain types of societal hypnosis for decades. They know what works and what doesn't. A friend of mine specializes in this type of hypnotic effect on society and you can [scroll through many articles he's written on his website](#) that discuss it.

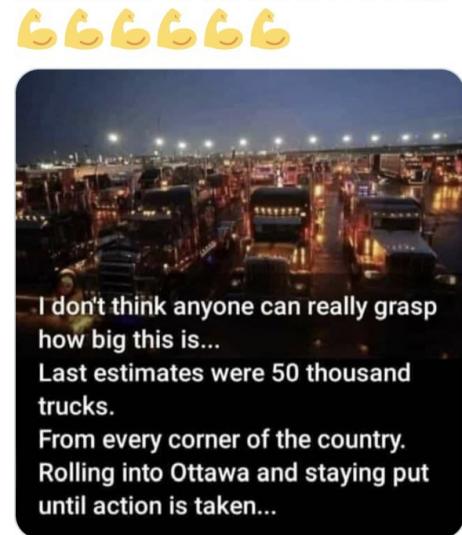

The death toll from CV19 is high, but so is the death toll from those who have taken the CV jab. While arguments continue on the reliability of VAERS or even from those who now seriously regret their decision to accept the CV19 jab (they're labeled "anti-vaxxers" now), the fact remains that many have been seriously injured and/or died following the taking of the CV jab. The often-heard excuse that "*if they had not had the CV vax, they would've died sooner*" might sound great to those who support the unending jab (two shots, then a booster, then another booster, etc.), but there is no proof that they would've died sooner had they not taken the jab. But no one wants to seriously investigate these things. Everyone turns a deaf ear to victims following their receipt of the CV jab.

But whether or not one considers VAERS a reliable source, the fact remains that the system the military uses to keep track of vaccine adverse effects they give to soldiers is really above question because the only people who can report to it are actual military doctors. In that case, according to attorney Thomas Renz, the uptick in cancers and other adverse reactions has skyrocketed. There appears a direct connection between all those adverse effects/injuries and the CV vax given to military personnel.

With all the problems that have potentially been caused and continue to exist among those who have taken the jab and

boosters, it is interesting that finally, things are *seemingly* beginning to turn around. The PM of the UK is canceling all mandates, including mandatory vaccinations (though individual companies in the UK are still going ahead with things as if nothing has changed). Other PMs from other countries are doing the same thing. In the USA, Biden and his administration continue to push mandates with Jen Psaki pushing companies here in the USA to continue with vaccine mandates even after the Supreme Court ruled against the Biden administration.

Truckers throughout the USA and Canada are organizing protests to get the message across to everyone that people shouldn't be forced to get the CV jab. Both Canada and the USA no longer allow unvaxxed truckers from other countries to bring in their loads. This will cause even worse disruptions in the supply chain. One has to wonder why there is this alleged need to force truckers to be vaxed since most of the time, they are completely alone in their cabs. In most cases, they simply drive their trucks from one place to the next. They do not necessarily load or unload those trucks themselves. That is done by someone else onsite. So what is the big concern?

All of this will surely affect the supply chain worse than it is now. With China holding onto [fertilizers and seeds becoming more expensive](#), we can be sure that within 6 months or so, things will look even worse than they do now unless something changes to keep that from happening. What's the harm in preparing for potential upcoming shortages? Corn for instance may become a very valuable and therefore expensive crop in 2022.

So if we take everything into consideration, it certainly appears that some type of psychosis or mass hallucination is affecting society.

Fear does strange things to people. There are many videos of people under the influence of *something*. They are besides themselves, not quite knowing how to react and cannot relax. Everything about them pleads for "safety," yet they cannot see that their cloth masks (or even N95s), do nothing to keep them "safe." If they were truly concerned about their safety, they would wear 3M 6000 (shown), or 7000 respirators, which protects the wearer (but not others). The average mask people wear today does *nothing* except hide their features and force them to re-breathe their exhaled carbon dioxide.

This is not healthy and it's taking its toll on adults and [children \(who now experience delayed speech\)](#), as well as a forcing people to distance emotionally from others.

Paul warned that God would one day send a strong or powerful delusion ([2 Thessalonians 2:10-12](#)).

*...and with every wicked deception directed against those who are perishing, because they refused the love of the truth that would have saved them. For this reason God will send them a powerful delusion so that they believe the lie, in order that judgment may come upon all who have disbelieved the truth and delighted in wickedness....*

Why does God send this delusion? Specifically, God sends this delusion (or deluding influence that hypnotizes), because people "...refused the love of the truth that would have saved them." That's it right

there and it is in preparation for the coming "man of sin" or Antichrist, who will lead the final Gentile global kingdom.

Pastor JD Farag out of Hawaii, has a prophecy update video that delves into this problem of a strong delusion. You can watch it [here](#) or if you'd prefer, you can simply read the transcript [here](#) with other resources he provides. I find that easier at times because I can scan quickly.

People today are literally fighting against God and His moral code. Here is a perfect example of this type of moral slide into the abyss of stupidity and immorality. [In this short video](#), a transgender argues that a woman is not a woman based on reproductive organs. A woman is a woman only if she personally identifies as a woman. For thousands and thousands of years, people understood that a man was male, and a woman female based on their *genitalia*. That no longer applies according to the Left. Gender "assignment" at birth should be done away with, allowing the person to make their own decision later in life. This is the height of stupidity and denial of God and His ordered creation; "*male and female He made them*" ([Genesis 2](#)).

This deluding influence has gained favor of Big Pharma with all the lies that have been perpetrated today because of their mandates. Big Pharma has, with the major help of Dr. Anthony Fauci (and politicians), created a very strong delusion that society lives under, by which people have done things they have not ever done. We've never masked up before regardless of how bad the annual flu became, nor did we ever social distance, cancel the habit of shaking hands and hugging, along with avoiding people, avoiding early treatment, staying home waiting for the vax, etc. Once the vax became available, mandates came to get both shots and then the booster. Some countries have offered a second or third booster to their citizens.

Yet now the [CEO of Pfizer](#) is saying that "frequent booster shots" is not a good idea. Why not? Well, as it turns out, the more people boost, the more harm they do to their immune systems. Gosh, who knew? People like Dr. Robert Malone knew, (the inventor of the mRNA technology, *not* of the mRNA vaccine), but of course, he was censored for his "misinformation." Members of the Pfizer board are also calling for an end to mask and vaccine mandates. What gives? Check [this](#), [this](#) and [this](#) article out for more.

Call me a skeptic, but it's difficult for me to believe that they've finally come to their senses. Could it be they have an ulterior motive? Forgive me for questioning things, but these people have a great deal to answer for but refuse to respond to questions. For them to simply decide now that we should dispense

## Pfizer Board Member Suggests End to Mask, Vaccine Mandates

By [Jack Phillips](#) | January 24, 2022 Updated: January 24, 2022

A A Print

with the mask and vaccine mandates makes me seriously question their motivation. They had absolutely *no* clue that there would be negative consequences of so many shots/boosters?

Beyond the shots themselves, the problem is that many to most who now wear masks, social distance and all the rest will *continue* doing that because they have been brainwashed to believe that this was the correct response to CV19. It has become ingrained in them.

In effect, as many epidemiologists stated back over two years ago, if we had just done what we did with every flu season, herd immunity would have already occurred and CV19 would be an issue largely of the past. Instead, health experts like Fauci told us to do the exact opposite and be afraid of catching something from others. By wearing masks, social distancing and shots/boosters, we *weakened* our immune systems, therefore too many could not combat the illness.

The foolhardy way in which these health experts have made the situation far worse by forcing school closures, masking, social distancing and economic lock-downs in general have done nothing to help people's immune systems. All this has made people *more* apt to contract what they were trying to avoid. Is this part of the plan? I hate to think it is, but it seems very possible, especially with all the information I've read from many doctors who, again, have been completely censored for their scientific opinions.

Yet, the truth keeps coming out. [Alex Berenson](#) notes that countries with the highest incidence of mRNA vaccinations also have the highest incidence of CV infection rates. Should this surprise anyone if what doctors like Malone and many others have been telling us is true?

What is going to happen next? Quite possibly, we may well start seeing more people dying from the after-effects of their compromised/weakened immune systems. It's already been reported that cancers and other major organ problems are on the rise. Some of that is due to the fact that those who were fighting cancer during the CV pandemic and could not get treatments then will likely die from their cancer if they haven't died already. Others will develop cancers that were latent within them, brought to the fore quite possibly by the destructive force of the mRNA vax. Of course, now people are being told that if they are not vaxed, [they cannot have life-saving procedures](#) so they'll be left to die. The CV vax seems to be treated as a new "sacrament" for many. By the way, if you'd like to know more about what's [actually in many vaccinations](#), please check this page out. Amazing that people are willing to put these things in their bodies and we're not just talking about fetal line cells.

Regardless of what MSM wants us to believe, much of global society seems to be living under the influence of lies created by Big Pharma and the Left in general. JD Farag often refers to **Revelation 18:23** and (**Galatians 5:19**), which states:

*...for thy merchants were the great men of the earth; for by thy sorceries were all nations deceived.*

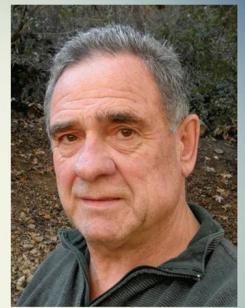

**Revelation 18** deals with the fall of Babylon. I believe will be an actual city (likely the headquarters of Antichrist, though it may be called something else), during the Tribulation period as well as a financial system that will continue to undergird the world's trade during that time. The system itself began with Nimrod's the Tower of Babel (**Genesis 10-11**). Even though God confounded things by introducing languages and cultures so that they stopped building a tower that went to the heavens, the Babylon system of witchcraft itself was never destroyed and exists to this day. The Greek word translated "sorceries" is *pharmakia*, which of course, is where we get our words, *pharmaceutical*, *pharma*, and *pharmacy*.

The world has been under the spell of Big Pharma for the past two years. I don't see that changing. Though Pfizer is *saying* we shouldn't get more boosters, they also know people will continue getting boosters so Pfizer will continue to provide them. Why? It's big **MONEY**. *Big* money.

We need to remember that all of this is very likely tied to [Agenda 2030](#), promulgated by the UN. For more on that, [here's a good thread](#) that explains it. While the narrative [appears to be falling apart](#), those who are brainwashed can't and won't see it. I know some Christians who completely downplay Agenda 2030 as "conspiracy," yet they've never taken the time to read the document itself produced by the UN. Go figure.

"For me to say that "vaccines are scooped out of a free-flowing sewer in Bangladesh" is NOT far from the truth. The reality is that 80% of all drugs sold in the US are made in China, and the other percentages are made in India and Bangladesh. More - there are NO Quality Control measures set in place, either at the manufacturing source, nor once they enter the US. I'd be willing to bet that, across the US, you couldn't find even one County or State, Health Official that knows, or even cares, what is actually inside that glass tube, or where it's made, that they want to inject into their neighbor's children."
