

Discerning the Times: CV-19, Robots and More!

CV-19 Vaccines

The new Johnson & Johnson vaccine that is cited as being the first and currently only one-shot vaccination for CV-19 rolled out around February 27 of this year. It joins the two-shot versions of Pfizer, Moderna and AstraZeneca.

I did a quick search and found that there are many articles highlighting the number of people who are believed to have died from complications after receiving the CV-19 vax. Search results are here: [Deaths from CV-19](#). It seems a good bet that if someone dies within a few weeks or less after receiving an injection of a purported vaccine, then chances are good that the vaccination had something to do with it. This shouldn't be rocket science, provided the person had no underlying health issues that were detected during an autopsy.

Recently, with respect to the new J&J vaccine, two people died not long after receiving the shot. [One person from NYC died the next day and another from Connecticut died](#) roughly a week later. In another case a [28-year old woman died two days](#) after receiving the mRNA vaccine. A pediatric nurse bragged about receiving the CV vax and her [baby was stillborn 8 days later](#).

In another article, apparently [534 people have died and 330,000 injured](#) after receiving the CV-19 vaccine in the UK. Let's not forget that the pharmaceutical companies all have *immunity* from prosecution. The European Database indicates that so far, 3,964 have died and 162,610 injuries have been sustained due to the vaccine.

In Israel, people who refuse the vaccination are [literally kept under house arrest](#). They will be allowed to go to grocery stores and pharmacies but that's pretty much it. The good news is that a class action lawsuit has been filed with the International court alleging the [Israeli government has broken the Nuremberg Code](#).

Of course, there are too many stories of elderly people dying where it was highly recommended they receive the vaccination. The FDA has only given emergency authorization for use of the CV-19 vaccine, yet it is being touted as though it was given full authorization. Of course, that takes years and numerous studies, which did not occur with the CV-19 vaccine. Essentially, the "studies" are being done *now* on the people who volunteer to receive it. In essence, many medical professionals are calling it "gene therapy" and they explain why that is the case. Remember that this is the first time that the mRNA component has been used within any vaccination ever. No one really fully knows what will occur because of that, but plenty of medical experts have their educated guesses and those guesses are not good.

As I've also pointed out previously, doctors like Tenpenny, Coleman, Bosche et al are all very concerned about what is happening. Never before in our history have we been so inundated with continuing propaganda from many quarters to "mask up, social distance, wash your hands and be safe." That, along with the now growing call for everyone to be vaccinated is not only disconcerting but should serve as a warning that something is drastically wrong. In spite of this, my mind boggles at the realization of just how many people are lining up to have mRNA and other [ingredients](#) injected into their systems. Yet, we have been told by Fauci that even with the

vaccination, people must continue to wear a mask and social distance. Fascinating how so many articles completely downplay any negatives associated with the ingredients in these vaccines, especially where mRNA is concerned or even thiomersal (mercury).

Logic is gone because of all the fear-mongering that has deeply affected people's ability to think critically. It literally boggles my mind.

Go through a drive-through fast food place. As you drive up to the pay window, the person will likely reach out a cup or bowl to you. You place your debit/credit card in that container. They then *remove* your card with their gloved hand. They run it, place it back into the container from which you retrieve it with your hand. What has been accomplished? Nothing. Absolutely nothing. Does the cashier change their gloves after each transaction? No. So with the same gloved hands that takes your card, they pack your meal and give you that meal in a bag. You take the bag and open it to reveal your food, which several people have touched. Were they all wearing gloves? Where those gloves changed after each customer? The absurdity is too much yet this is becoming and is the new normal for today.

Went to a car rental today to pick up a car because ours in in the shop. Everyone was wearing a mask except me. Two people were talking on cell phones with their masks pulled down to their chins while doing so. Do they change their masks every few hours or even every day? Not likely.

Watched several people wearing masks inside their vehicles with no one else in the car with them. Why? Do they think they are "safer"?

The truth is - according to many medical personnel - by masking up, social distancing and washing our hands all the time, we are actually *harming* our immune systems. Our immune systems work when they encounter germs and our bodies (when healthy) are finely tuned to distinguish between bad germs and good ones. By staying away from other people, by wearing masks that force us to re-breathe our carbon dioxide, by washing our hands constantly, we are keeping our immune systems from doing their jobs. The world is a germ-filled place. The idea that we can avoid germs and thereby gain or remain healthy is asinine. We cannot do that and our bodies were not made for that purpose (after the fall).

I firmly believe globalists, under the direction of Satan, have masterminded a plan that will do several things to humanity:

1. it will ultimately make us very *unhealthy*
2. it will bring about major diseases and illnesses that people will not be able to fight off
3. it will destroy our freedoms as it has done
4. it will usher in the final global government

Numerous medical doctors have warned that the CV-19 vaccine will cause more problems than it will correct or solve. They expect that within the next year, cytokine storms will occur within people who have had the vaccinations because their immune systems will be destroyed. Nothing will save them. They will die. These doctors are usually cast off as "conspiracy theorists." This type of reaction to the vaccine will be far removed from the date of injection so any connection

will be seriously denied. In fact, what may well occur will be another major push to have *more* vaccinations because of an apparent new "variant" of CV-19. Those who continue to refuse to take the vaccination will be seen as "terrorists."

Robotic City?

A new, [mega-city being built by the Saudis](#) on the coast of the Red Sea will be thoroughly futuristic. Apparently, the city will be 33 times larger than New York City.

It will cover 10,230 square miles, and cost Saudi Arabia's Public Investment Fund at least \$500 billion — plus millions in foreign investment if it can get it.

The name of the city is Neom, which is Greek for "new" and Arabic for "future." The city will have many high-tech, futuristic aspects to it.

- Neom is supposed to draw on "cloud seeding" technology to make artificial clouds which will produce more rainfall than naturally possible in the desert.
- Neom will also have the "leading education system on the planet," with classes taught by holographic teachers
- Neom will include a 'Jurassic Park'-like island for tourists with robotic dinosaurs.
- Neom will be illuminated by a giant artificial moon at night
- Neom will have flying taxi services
- Red Sea coastline will be altered, according to the plans, with glow-in-the-dark sand added to its beaches
- Neom Bay one of Neom's residential areas, is due to become a residential area with "white beaches, a mild climate and an attractive investment environment

Will Neom become the Tribulation's "Babylon" of Revelation 17? It's certainly possible and the scheduled completion date is 2025.

Of course, if you want to participate in this coming mega-metropolis, we're certain you'll need to have and keep your vaccination passport updated with any and all vaccines decreed to be beneficial.

Folded Man Stands

I want to end this on a solid up note. [A man in China](#) suffered from what is known as ankylosing spondylitis, a condition where inflammatory arthritis affects the spine and large joints. Ultimately, this means that a person's bones are fused together. In this case, the young man's body folded in half. He spent the last 28 years in a folded position. I realize this is not the "up" part of the story. The actual "up" part is what doctors were able to do for the man after four grueling surgeries that could've resulted in the man's death in each case.

Sometimes, I'm annoyed when I get headaches or cannot do what I was able to do 20 or 30 years ago. But my problems are *nothing* compared to this man's problems. Here is the video that highlights the man's surgeries and return to health. Imagine never being able to look up at the sky. Imagine never being able to sleep on your back.

Watch this video and do not be surprised when you start shedding tears of joy or even tears of how you've mistreated God for being upset with the things that have plagued you when in point of fact, in all likelihood, your life (and mine) is not nearly as bad as this man's was during the years he suffered from something he had no control over.

[Folding Man Stands](#)

There is so much that I have to be thankful for and I need to remind myself of those things every...

single...

day.
