

PLEASE NOTE THE PALMYRA BELT OF FAULTS AND FOLDS. THIS GREAT STRUCTURAL WEAKNESS EXTENDS NORTHEASTWARD TO LINK THE JORDAN AND EUPHRATES RIVERS. WHEN THE ARABIAN AND AFRICAN PLATES PULL APART, THIS WEAKNESS WILL COLLAPSE, AND THE EUPHRATES WILL FLOW INTO THE UPPER JORDAN.

THE PALMYRA BELT OF FAULTS AND FOLDS

THE PARALLEL DASHED LINES (F_1 AND F_2) ON BOTH SIDES OF THE GREAT RIFT VALLEY FROM THE GULF OF AQABA TO LEBANON ARE SHOWN ON BOTH PART A AND PART B OF THIS FIGURE. THESE TECTONIC FAULT LINES PENETRATE DOWNWARD ERRATICALLY TO EVENTUALLY MAKE CONTACT WITH HOT, LIQUID ROCK. BETWEEN THESE DASHED LINES A GREAT BLOCK ("B" ON PART B) OF THE EARTH'S CRUST IS HELD IN PLACE BY THE PRESSURES OF TWO MASSIVE TECTONIC PLATES ("A" AND "P" ON PART B). THESE TWO PLATES WILL SUDDENLY MOVE APART WHEN THE TENSIONAL PRESSURE OF THE RED SEA SPREADING EXCEEDS THE COMPRESSIONAL FORCES THAT CURRENTLY HOLD THE GREAT BLOCK IN PLACE. AS THIS OCCURS GREAT BLOOD-RED FOUNTAINS OF LAVA, HUNDREDS OF FEET HIGH, WILL BURST ONTO THE SURFACE ALONG BOTH SIDES OF THE JORDAN VALLEY. ADDITIONALLY, THE OFF-SHOOT FAULT EXTENSION, THAT RUNS FROM THE JORDAN RIVER VIA MEGIDDO TO HAIFA, WILL OPEN WIDE ENOUGH TO PRODUCE FANTASTIC EARTHQUAKE ACTIVITY. IT IS ALONG THIS LINE THAT THE MAJOR PORTION OF THE BATTLE OF ARMAGEDDON IS TO BE FOUGHT.

PART B - A NORTHWARD VIEW OF THE FAULT BLOCK TOP AND ITS INTERIOR.
 FIGURE 24 - THE GREAT FAULT BLOCK OF ISRAEL

- A - AFRICAN TECTONIC PLATE
- B - GREAT JORDAN VALLEY FAULT BLOCK
- D - DEAD SEA
- F_1 - DEEP VERTICAL FAULT ON WEST BANK
- F_2 - DEEP VERTICAL FAULT ON EAST BANK
- G - SEA OF GALILEE
- J - JERUSALEM
- P - PERSIAN TECTONIC PLATE

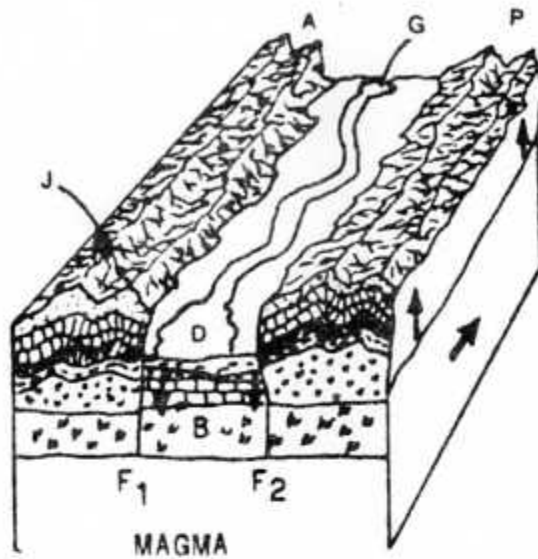

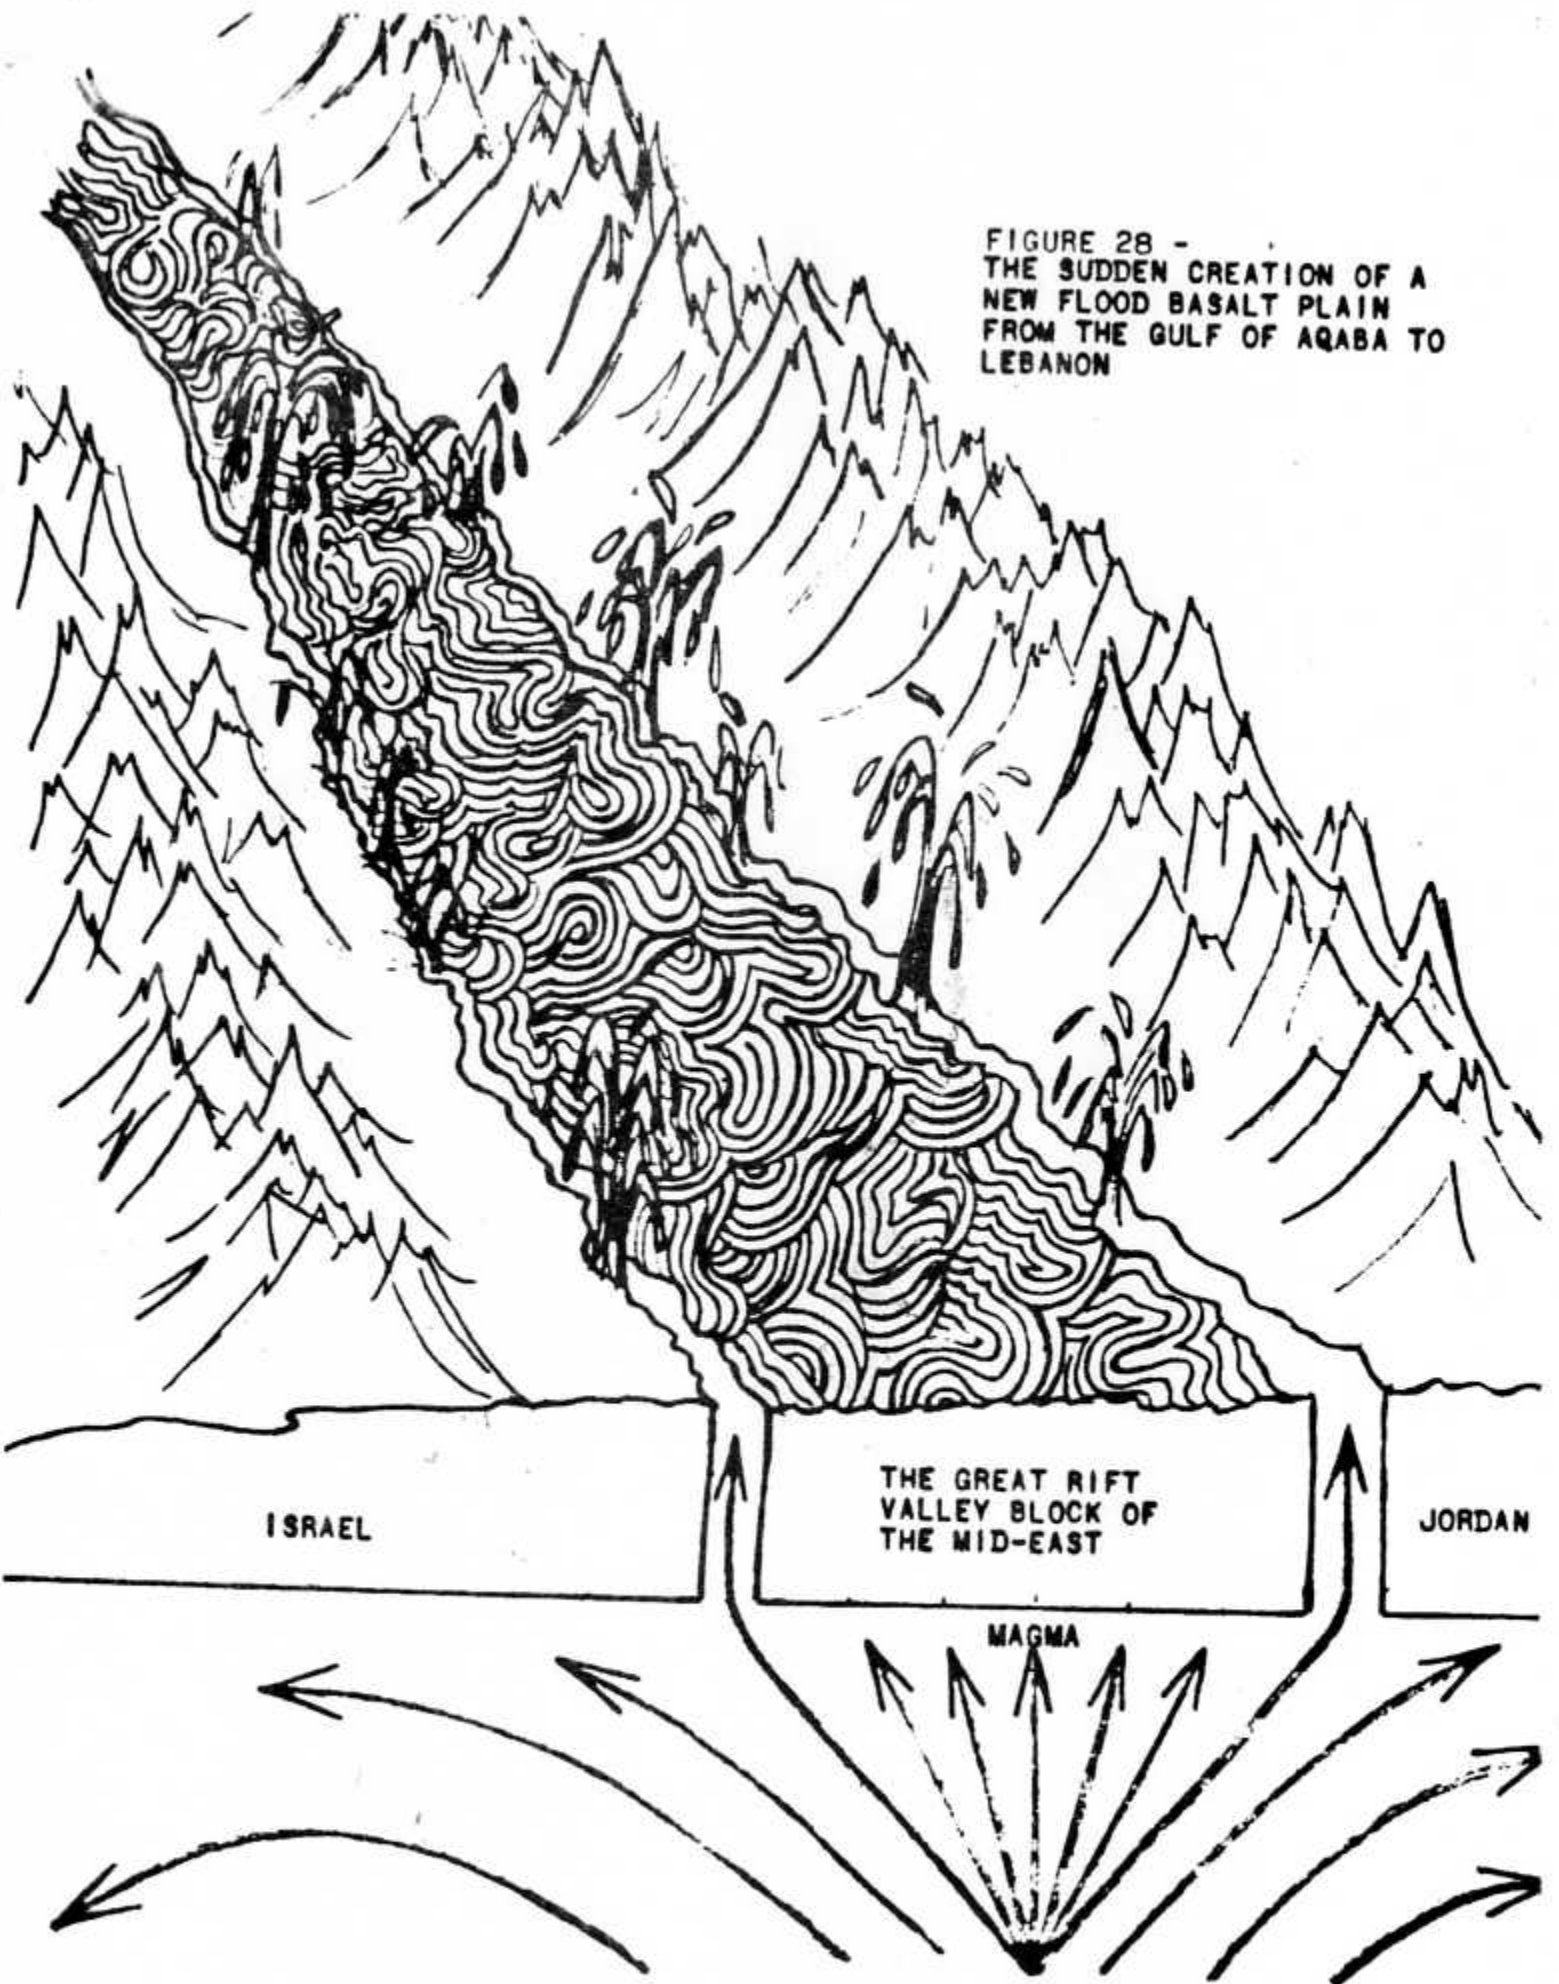

FIGURE 27 - THE VALLEY
TO BE
TRANSFORMED

- A - AFRICAN TECTONIC PLATE
- B - GREAT JORDAN VALLEY FAULT BLOCK
- D - DEAD SEA
- F₁ - DEEP VERTICAL FAULT ON WESTERN SIDE OF JORDAN VALLEY
- F₂ - DEEP VERTICAL FAULT ON EASTERN SIDE OF JORDAN VALLEY
- G - SEA OF GALILEE
- J - JERUSALEM
- P - PERSIAN PLATE

THE JORDAN RIVER LIES ATOP A HUGE BLOCK OF LAND MASS CLAMPED TIGHTLY BETWEEN THE MASSIVE AFRICAN AND PERSIAN TECTONIC PLATES. F₁ AND F₂ ARE DEEP CRACKS ON BOTH SIDES OF THE VALLEY THAT WEAVE THEIR WAY ERRATICALLY DOWNWARD INTO UNDERGROUND LAKES OF LIQUID MAGMA. WHEN CERTAIN TENSIONAL PRESSURE IS REACHED IN THE GULF OF AQABA, THE AFRICAN AND PERSIAN PLATES WILL SUDDENLY PULL APART, ALLOWING FOUNTAINS OF HOT, LIQUID ROCK TO FLOW UP THROUGH F₁ AND F₂. THE ENTIRE JORDAN VALLEY WILL BECOME A RAGING FLOOD BASALT PLAIN. THE JORDAN FAULT BLOCK VALLEY ("B" ON DIAGRAM) WILL BE LIFTED, LOWERED, TORN, CRUMBLED, AND COMPLETELY TRANSFORMED DURING THE LATTER PORTION OF THE TRIBULATION PERIOD. IT WILL BE THE GREATEST GEOLOGICAL TRANSFORMATION IN RECORDED HISTORY.

MAGMA

THE PARALLEL DASHED LINES (EXTENDING ON BOTH SIDES OF THE GREAT RIFT VALLEY FROM THE GULF OF AQABA THROUGH LEBANON) PENETRATE DOWNWARD ERRATICALLY TO EVENTUALLY MAKE CONTACT WITH HOT, LIQUID ROCK. BETWEEN THESE DASHED LINES A GREAT BLOCK OF THE EARTH'S CRUST, THOUSANDS OF FEET DEEP, IS HELD IN PLACE BY THE PRESSURES OF TWO MASSIVE TECTONIC PLATES. THESE TWO PLATES WILL SUDDENLY MOVE APART WHEN THE TENSIONAL PRESSURE OF THE RED SEA SPREADING EXCEEDS THE COMPRESSIONAL FORCES THAT CURRENTLY HOLD THE GREAT BLOCK IN PLACE. AS THIS OCCURS GREAT BLOOD-RED FOUNTAINS OF LAVA, HUNDREDS OF FEET HIGH, WILL BURST ONTO THE SURFACE ALONG BOTH SIDES OF THE JORDAN VALLEY. ADDITIONALLY, THE OFF-SHOOT FAULT EXTENSION, THAT RUNS FROM THE JORDAN RIVER VIA MEGIDDO TO HAIFA, WILL OPEN WIDE ENOUGH TO PRODUCE FANTASTIC EARTHQUAKE AND VOLCANIC ACTIVITY. IT IS ALONG THIS LINE THAT THE MAJOR PORTION OF THE BATTLE OF ARMAGEDDON IS TO BE FOUGHT.

ALSO, PLEASE NOTE THE PALMYRA BELT OF FAULTS AND FOLDS. THIS GREAT STRUCTURAL WEAKNESS EXTENDS NORTHEASTWARD TO LINK THE JORDAN AND EUPHRATES RIVERS. WHEN THE TWO PLATES PULL APART, THIS WEAKNESS ZONE WILL COLLAPSE, AND THE EUPHRATES WILL FLOW INTO THE UPPER JORDAN.

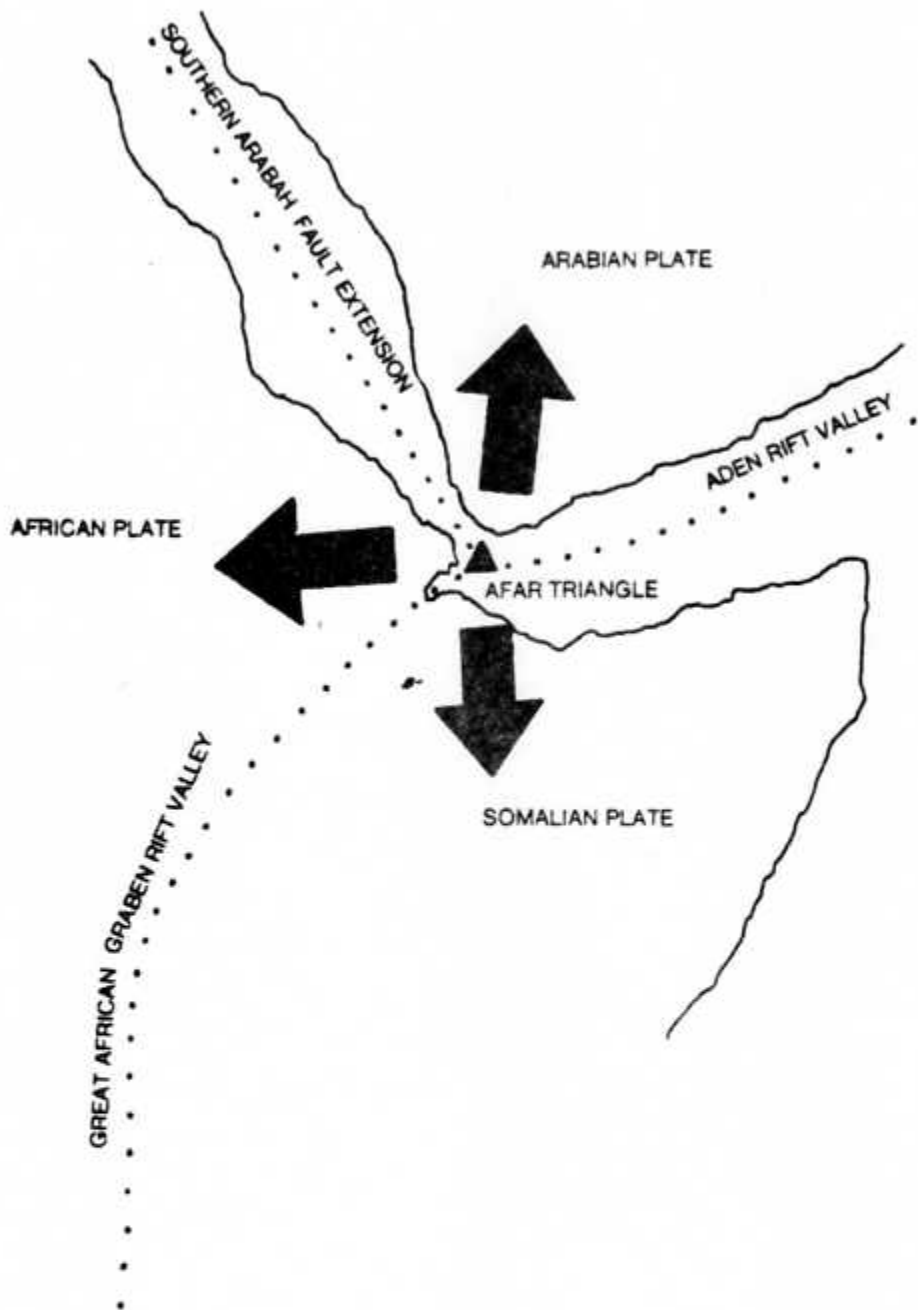

FIGURE 30— THE GREAT AFRICAN RIFT VALLEY AND THE AFAR TRIANGLE
 THE VOLCANIC CENTER AT THE AFAR TRIANGLE IS A ZONE WHERE MAGMATIC MATERIALS FLOW UPWARD AND OUTWARD FROM THE DEEP MANTLE OF THE EARTH. THIS CONVECTIVE ACTION IS CAUSING THE AFRICAN, SOMOLIAN, AND ARABIAN PLATES TO SPREAD AWAY FROM A SINGLE POINT — THE TRIPLE POINT OF THE AFAR TRIANGLE

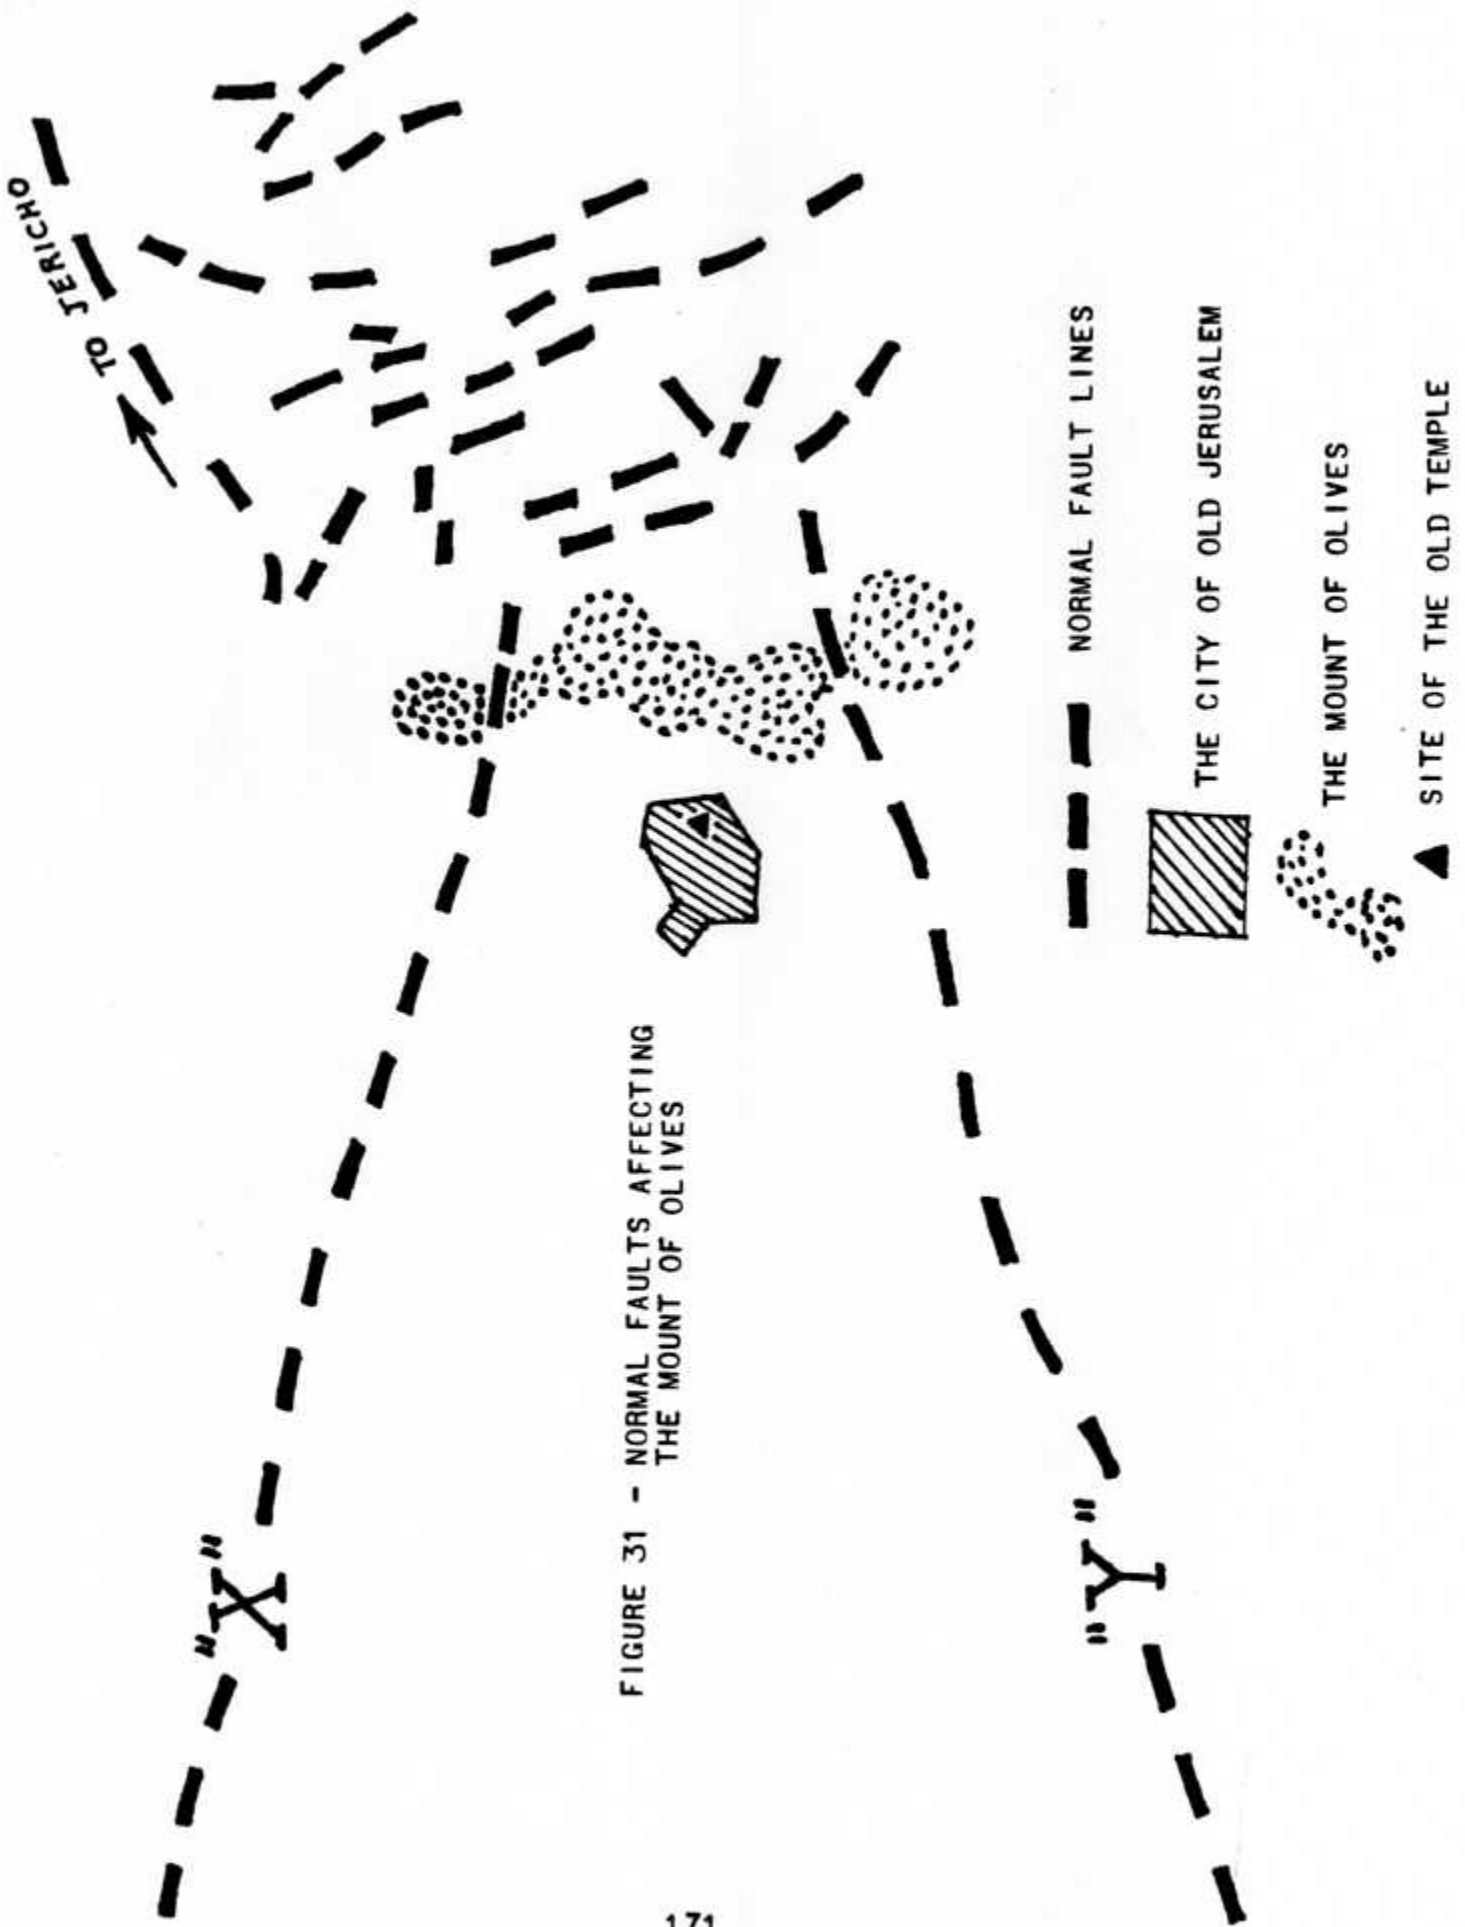

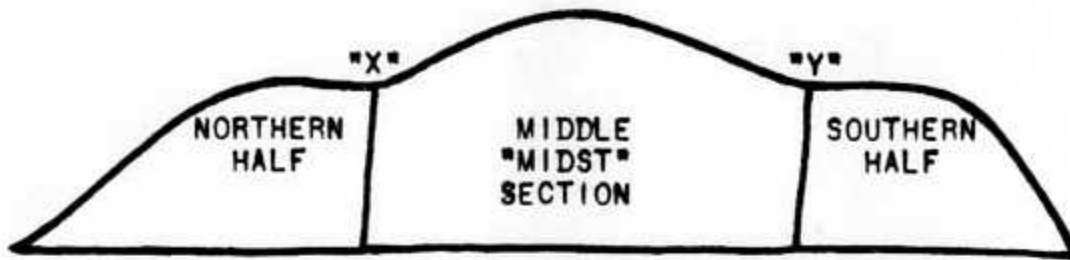

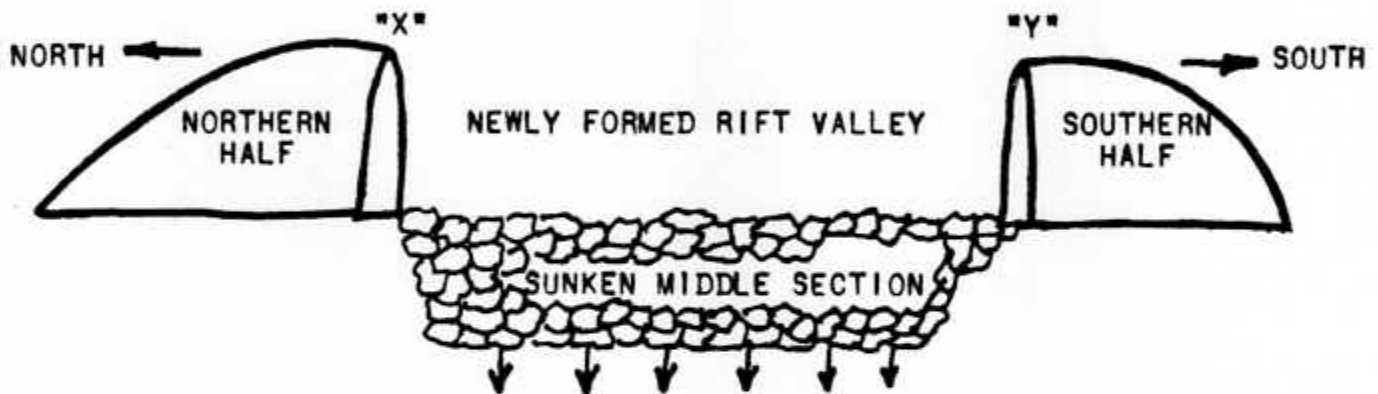

FIGURE 31 - NORMAL FAULTS AFFECTING THE MOUNT OF OLIVES

PART A - MOUNT OF OLIVES BEFORE THE DIVISION

PART B - MOUNT OF OLIVES AFTER THE DIVISION

FIGURE 32 - THE DIVISION OF THE MOUNT OF OLIVES

THIS NEWLY FORMED RIFT VALLEY WILL EXTEND AS FAR WESTWARD AS THE TYROPOEON VALLEY, AND ABOUT 6000 FEET EASTWARD FROM WHERE THE EASTERN GATE OF OLD JERUSALEM NOW STANDS.

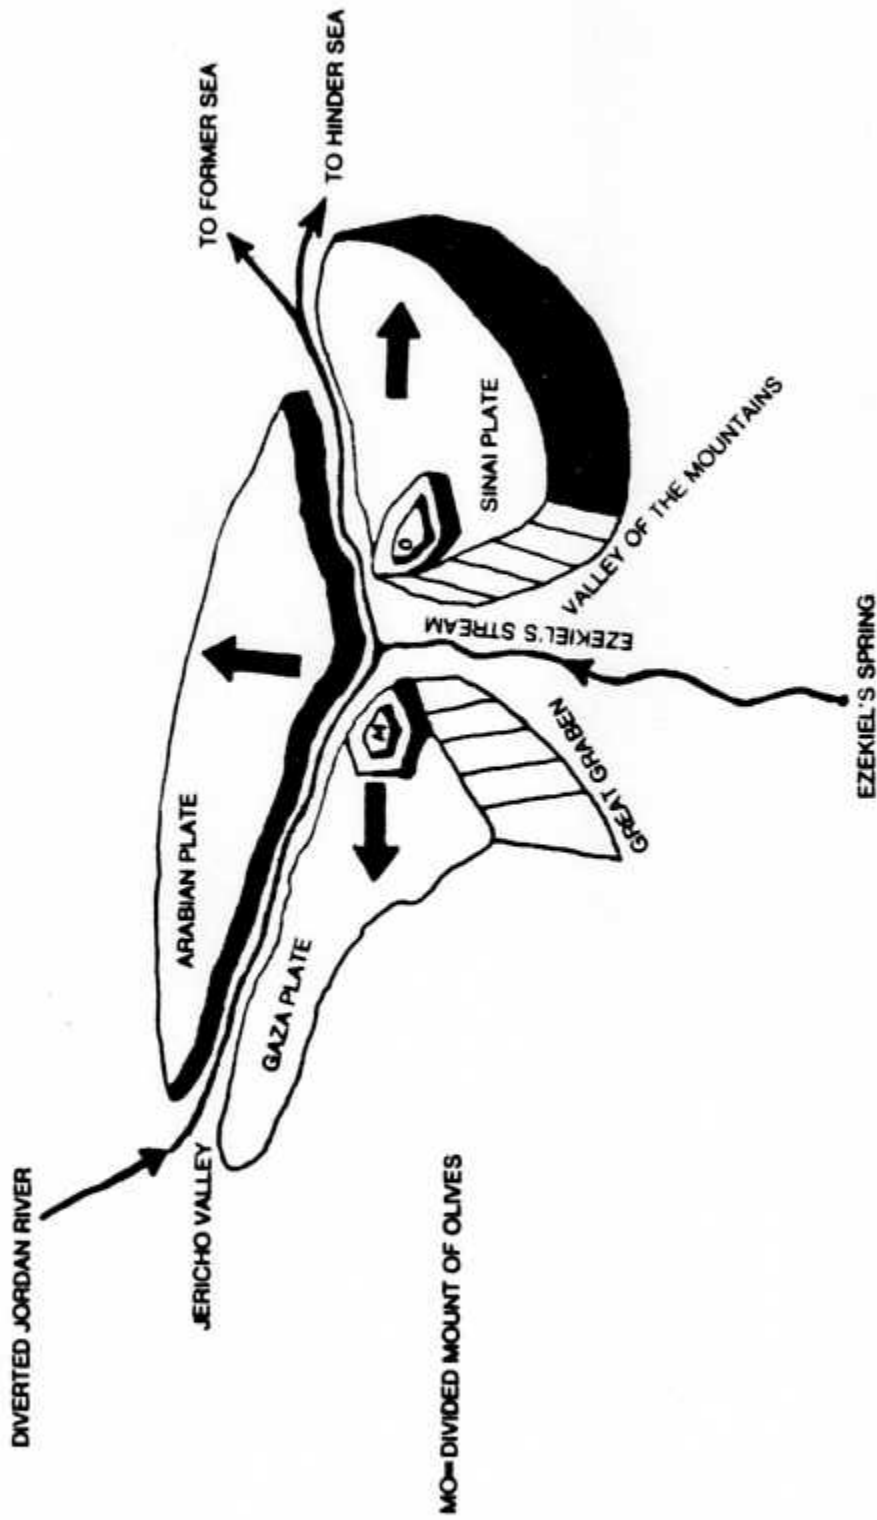

FIGURE 33 — A New Triple Point Will be Formed in the Northern Extension of the Great African Rift Valley. It Will Be Like the Afar Triangle That Currently Separates the Arabian, African, and Somalian Plates. I Call it the Zechariah Triangle.
