Sermon Outline for Sunday, June 26, 2022

Sermon: "Roe v Wade and Civil War."

I Text:

Old Covenant: *Exodus 32:19-29*

New Covenant: *Romans 1:28-32*

II Doctrine:

The Supreme Court of the United States has overturned the ruling of *Roe V. Wade*, which protected a woman's right to kill her unborn child. This ruling has been with our nation since 1973. The issue of "abortion rights" is now given back to the state governments for legislation.

We must understand the right to have an abortion was granted on the basis of medical privacy. A woman was allowed to make a private medical decision ("My Body My Choice") without interference from the Federal government. The fourteenth amendment was used as justification. The Supreme court did not define a fetus as a life which would have ended all abortion, it only gave the issue of medical privacy back to the states. Depending on what state you live in will determine how much control they have over your health. Of course this opens the door for your home state to coerce you into vaccinations, and other health procedures!

These types of decisions will continue to put the nation on a path of balkanization. People will continue to vote with their feet, and move to certain states based on the legal climate. God willing this will allow Christians to relocate to certain states to escape LGBTQ tyranny. There is already a civil war between those who obey the laws of life and those who do not, in this nation. We will have two Americas develop in the nation. States which cater to the LGBTQ rainbow cult of death, and those who do not. May this plan to divide and conquer us backfire, and by God's sovereignty may Christians have a nation which pleases God. I pray those who obey the laws of Jesus Christ will have a place to safely raise their families.

III Comparing Scripture With Scripture:

1) The Supreme Court of the United States has overturned the ruling of *Roe V. Wade*, which protected a woman's right to kill her unborn child. This ruling has been with our nation since 1973. The issue of "abortion rights" is now given back to the state governments for legislation.
