

What's In It?

(September 2, 2021)

4. [CV-19 injections using aborted fetal cell lines](#)
5. [Eternity Matters - Roundup \(issues affecting us today\)](#)

Regarding the above information on fetal cells either *in* or *used* to create vaccines, I'm not sure how anyone who calls themselves a Christian can take these vaccines into their bodies. But I'm sure that some Christians have no problem with it or will explain it away. Either that or they are completely unaware of the presence of aborted fetal cells or the use of them to produce specific vaccine injections because they've not bothered to search out the information. But when has ignorance been an acceptable excuse?

The Bible tells us in **1 Corinthians 6:15-20**, that our bodies, once we become Christians, are literally the temples of the Holy Spirit.

Do you not know that your bodies are members of Christ? Shall I then take the members of Christ and make them members of a harlot? Certainly not! Or do you not know that he who is joined to a harlot is one body with her? For “the two,” He says, “shall become one flesh.” But he who is joined to the Lord is one spirit with Him.

Flee sexual immorality. Every sin that a man does is outside the body, but he who commits sexual immorality sins against his own body. Or do you not know that your body is the temple of the Holy Spirit who is in you, whom you have from God, and you are not your own? For you were bought at a price; therefore glorify God in your body and in your spirit, which are God's.

Clearly, Paul is speaking directly of the problem of sexual immorality to the Corinthian believers. This type of sin was rampant during the first century largely, but not solely, due to pagan temple prostitution that existed. But more than that, there were issues within that group of believers of sexual immorality that no one seemed to bat an eye about. Paul was trying to correct their misunderstanding and redirect them away from their sin. The text above represents one of the ways in which he was attempting to do so.

But though the direct application appears to be Paul's prohibition against sexual immorality in all forms, there are other applications as well. The overall point of what Paul is saying is that Christians must guard their bodies from things that can harm spiritually and/or physically, if for no other reason than the fact that the body is where the Holy Spirit resides within us. What we do to our bodies can absolutely affect our relationship to God as it will either create a schism through sin to the residing Holy Spirit or what we do to our bodies will enhance that situation.

I think it goes without saying that what we put into our bodies and what we use our bodies to engage with will make or break us, both in spiritual and physical areas. I think we would all agree (or should), that what we put into our bodies can and does affect our health.

Because of that, we should *not* want to put anything in our bodies (or do anything with them), that could compromise our health. I hope you would you agree with that. Yet, too many pay no attention to what they're eating (or engaged in), and the ingredients in the "food stuff" they purchase. I learned over the past four years to read every label because there are things that are simply detrimental to my health in nearly all processed foods.

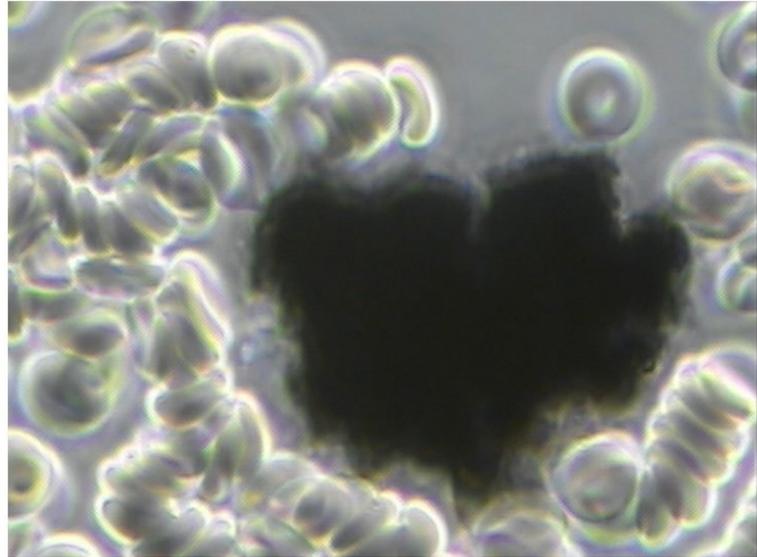

Figure 1 is a Micrograph of a Carbon Cluster of Reduced Graphene Oxide (rGO) Viewed in the Live Unstained Human Blood with pHase Contrast Microscopy at 1500x. Note that the Red Blood Cells are Clotting in and Around the rGO Crystal in a Condition Known as Rouleau: A French Word Which Means to Chain.

That brings me to the COVID-19 injections. For a long time now, "fact checkers" have been telling us that *graphene oxide* is **not** among the ingredients in these injections. To continue to claim otherwise, they say, is the stuff of conspiracy theories. The problem with this is the fact that not one of the manufacturers of the CV injection has listed *all* of their ingredients on the information sheet that comes with the injection(s), and they don't have to either. They're simply not telling people what is in their concoctions because of "trade secrets" and "patented" information.

Thanks to the hard work of some individuals within the medical profession, we now know what is in these "vaccines." In this particular article, sent to me by a reader, Dr. Robert O Young CPC, MSc, DSc, PhD, Naturopathic Practitioner, helps us understand not only what is in the injections, but the intricate scientific process used to learn of those specific ingredients.

[Scanning & Transmission Electron Microscopy Reveals Graphene Oxide in CoV-19 Vaccines](#)

explains the intricate process that was used to discover the actual ingredients. I cannot emphasize enough that readers should read the article thoroughly, download it if possible in case it disappears from the 'Net through censorship (select all of it, copy it and paste it into a Word document), and absorb its contents, then continue researching.

Just this morning, I saw a person on Facebook talking about how good she *felt* about taking the CV vaxxes after "*much prayer and thought.*" After reading the above article, I'm even more dismayed that people are so glad they have taken what may in fact turn out to be poison into their bodies. Interestingly enough, she stated that she had previously had a bout with CV and had gotten over it. She mentioned nothing about antibodies and we're talking about an illness that has a 99.8%+ survivability rate, something that is seriously downplayed by medical "experts" and

the media. Yes, I'm sure the illness doesn't feel good (and can kill), but neither does the flu or pneumonia and people also get over those (though some die). I don't see a vaccine for pneumonia, do you? The flu vaccine has questionable success at best.

Let me include again this link to a 17-minute video from a pathologist: [A pathologist's summary of what the CV injections do to brain and other organs \(17-minute video\)](#)

As the article notes, "*Phase Contrast Microscopy, Transmission and Scanning Electron Microscopy and Energy-Dispersive X-ray Spectroscopy Reveal the Ingredients in the CoV-19 Vaccines!*" The process explained by Dr. Young and his team is thorough. Yes, you get the points of the article, but there is a great deal of medical verbiage to wade through. The truth is summed up in the fact that according to Young and others he cites, reduced graphene oxide (rGO), *is absolutely* one of the components of the injections. He then details the problems with rGO.

Young states, "*...using different instrumentation and protocols of preparation according to new nano particulate technological approaches.*" The exact instrumentation and protocols included, "*...Optical Microscopy, Bright-Field Microscopy, pHase Contrast Microscopy, Dark-Field Microscopy, UV absorbance and Fluorescence Spectroscopy, Scanning Electron Microscopy, Transmission Electron Microscopy, Energy Dispersive Spectroscopy, X-ray Diffractometer, Nuclear Magnetic Resonance instruments were used to verify the "vaccines" morphologies and contents. For the high-technology measurements and the care of the investigation, all the controls were activated and reference measurements adopted in order to obtain validated results.*"

The article also includes video of blood under a microscope affected by ingredients of CV injections, as well as many still images of artifacts discovered to be part of the injections. After discussing the exact process used to determine ingredients, the question is asked: "*What Are the Non-Disclosed Ingredients Contained in CoV-19 So-Called Pfizer, Moderna, Astrazeneca and Janssen Vaccines?*" and answer given.

According to Dr. Young, the ingredients are:

Pfizer:

1. reduced graphene oxide (rGO)
2. *Trypanosoma parasites (composed of carbon, oxygen chromium, sulphur, aluminum, chloride and nitrogen)
3. white 2-micron-long particulate (bismuth, carbon, oxygen, aluminum, sodium, copper and nitrogen)
4. organic (Carbon-Oxygen-Nitrogen) aggregate with embedded nanoparticles of bismuth, titanium, vanadium, iron, copper, silicon, aluminum

AstraZeneca:

1. Engineered aggregate of iron, chromium and nickel also known as stainless steel

2. **molecules of histidine, sucrose, ***Poly-ethylene glycol (PEG) and ****ethylene alcohol

Janssen

1. A Stainless Steel Aggregation of Carbon, Oxygen, Iron and Nickel Held Together With Graphene Oxide

Moderna:

1. a mixed entity of organic and inorganic matter
2. carbon-based Reduced Graphene Oxide substrate where some nanoparticles are embedded
3. nanoparticles are composed of carbon, nitrogen, oxygen, aluminum, copper, iron and chlorine
4. Many foreign bodies...***composed of carbon, nitrogen, oxygen, silicon, lead, cadmium, and selenium
5. ^a 100-micron symplast of reduced graphene oxide nano particulate composite

Gee, who would NOT want the above ingredients pumped into your body? Let's not even include the fact that aborted fetal cells are either in these injections or used to produce them. Just consider how our bodies are gloriously created and then consider the amount of things that should NOT be put into them, but I digress.

Dr. Young refers to "The Corona Effect" and "Spike Protein," which "*...ARE Caused by Chemical and Radiation Poisoning from Reduced Graphene Oxide and Microwave Radiation...*" He includes slide images that highlight the effect on red blood cells (figures 24 & 25 of article), which, he notes, are "*...caused by decompensated acidosis of the interstitial and then vascular fluids from an acidic lifestyle and specifically, exposure to toxic pulsating electro-magnetic fields at 2.4GHz or higher, chemical poisoning from the food and water ingested, toxic acidic air pollution, chem-trails and to top-it-all-off a nana particulate chemical laden CoV - 19 inoculation!*" This may seem to be "conspiratorial" to many, but shouldn't we be willing to consider the possibility?

Again, there are many images and at least one video highlighting what Dr. Young presents, making it easier for the average person to follow his reasoning. Ultimately, Dr. Young asserts that these injections are *not* vaccines in the true sense of the word. They are *drugs*, but labeling them as *vaccines* allows the pharmaceutical companies to avoid liability, unlike when producing drugs.

(the "vaccines" are)...nanotechnological drugs working as a genetic therapy. The name "vaccine" is likely to be an escamotage (trickery) used for bureaucratic and technocratic reasons in order to receive an urgent approval, ignoring all the normal rules necessary for new drugs, especially for those involving novel nanotechnological mechanisms which have never been developed nor experienced by humans any where, at any time in the history of World.

...Humanity is kept in the dark as far as the nano particulate technological processes involved are concerned, on the negative effects on the cells of the body, but mostly on the possible magneticotoxic, cytotoxic and genotoxic nano-bio-interaction effect on the blood and body cells.

Yet, in spite of this information, people continue to line up to actually have the injections that will very likely harm or kill them. Not only are people kept in the dark about the actual ingredients, but it may play out exactly as Satan would have it play out; with vast amounts of subterfuge. Are we being duped with too many people falling in line in to receive injections that may not only lack efficacy but may do a great deal of harm to the recipients, including potential death?

The Pfizer, Moderna, Astrazeneca and Janssen drugs are **NOT** "vaccines" but complexed Graphene Oxide nano particulate aggregates of varying nano elements attached to genetically modified nucleic acids of mRNA from animal or vero cells and aborted human fetal cells as viewed and described above. Once again the ingredients in these so-called vaccines are highly magneticotoxic, cytotoxic and genotoxic to plant, insect, bird, animal and human cell membranes and their genetics which already has lead to serious injuries (estimated at over 500 million) and/or eventual death (estimated at over 35 million).[17][18] through [55]

Why is this happening? What will the results be? If Dr. Young and team are correct, the results will not be good and if VAERS has any truth in it, we're already seeing some of those results. Within the next few years, could literally millions of people die? Dr. Young without equivocation believes so. By the way, isn't it interesting that the same people who believe the government when it tells us 4 *million* people have died due to CV, are the same people who question VAERS and the deaths and injuries listed there. If VAERS is that questionable, then let's get rid of it as a reporting system.

I'm very aware that this all sounds conspiratorial, doesn't it? But that is true only if we can fully trust the pharmaceutical companies and governments. Do you? It appears they may well be injecting parasites directly into people that can cause AIDS, as well as rGO, aggregates containing many heavy metals and other foreign bodies. Why are we ignoring the fact that CV-19 has a survivability rate of at least 99.8%+ depending upon your demographic?

Are Paul's words in **1 Corinthians** just related to illicit sex or, by application, do they have a broader meaning that we should be exceedingly careful about anything we put into our bodies? In truth, shouldn't anything that hampers our physical or spiritual health should be avoided?

Upcoming articles will highlight how *uncomfortable Christianity* has become for Christians today even in America and we'll continue our series on "CV and Future Events" as well as our study on Jeremiah and Lamentations. Join me then!

*Trypanosoma cruzi parasite of which several variants are lethal and is one of many causes of **acquired immune deficiency syndrome or AIDS**. [Atlas of Human Parasitology, 4th Edition, Lawrence Ash and Thomas Orithel, pages 174 to 178][9]

**also contained in Pfizer and Moderna injections

***The injection of PEG and Ethylene alcohol are both known as carcinogenic and genotoxic

****This highly toxic nano particulate composition are quantum dots of cadmium selenide which are cytotoxic and genotoxic

^The rGO is composed of carbon and oxygen with contamination of nano particulates of nitrogen, silicon, phosphorus and chlorine Chlorine
