

Have you thought about God lately? I mean, about how big and powerful He is? This morning we are going to look at four words in our Bibles.

Genesis 1:1 In the beginning God created the heavens and the earth. In an instant, and from nothing God made everything. Have you thought about how big a statement "In the beginning God " really is?

To start with, science can take us back to the Big Bang, but knows nothing of what existed before that bang. But here in utter simplicity we find the explanation in seven Hebrew words and ten English words.

God has no beginnings. The universe does, we humans do, but God the subject of this verse, has no start nor finish. He is God!

Some have scoffed that the Bible, and especially Genesis 1 is so un-scientific. Really now, is it. Think if you can remember back to High School chemistry when we learned about chemical symbols. Since I'm not a scientist may I quote a long standing British professor of Chemistry. This is what Frederick A. Filby says in his testimony recorded in a book *Creation Revealed*.

The sciences which probe most deeply into the ultimate facts of matter and life are probably astro- and nuclear physics and biochemistry. But these sciences are written no so much in languages as in symbols. It takes many symbols to discuss the nature of a single atoms of hydrogen. . . a single virus . . . would take a 200-page book.

If the scientific description of a single hydrogen atom, or of a virus too small to be seen without a microscope, takes a book, what hope is there of ever giving a scientific account of the creation of man and the universe? Yet Genesis 1 in its original form uses only 76 different root words. If Genesis 1 were written in absolute scientific language to give an account of creation, there is no man alive, nor has there ever been, who could understand it. If it were written in any kind of scientific language only the favored few could read it. . . The scientific description of the "how" of the universe is beyond the understanding of any human brain, but Genesis 1 was written for all readers, not for none . . .

Genesis 1 is the most amazing composition in all the world's literature, using only 76 different word-forms fundamental to all mankind, arranged in a wonderful poetic pattern yet free from any highly colored figures of speech. It provides the perfect opening to God's Word, and establishes all that we really need to know of the facts of creation. No man could have invented it: it is as great a marvel as a plant or a bird. It is God's handiwork, sufficient for Hebrew children or Greek thinkers or Latin Christians; for medieval knights or modern scientists or little children; for cottage dwellers or cattle ranchers or deep sea fishermen; for Laplanders or Ethiopians, East or West, rich or poor, old or young, simple or learned . . . sufficient for all! Only God could write such a chapter, and He did[1]."

Have you thought about how big a statement "In the beginning God created the heavens" is? Why don't we try to just sneak a quick peek at how great Thou our God in Heaven truly art? Our universe is vast:

- If a page the thickness of the paper in your Bible were to equal the distance from the earth to the sun (which is a mere 93 million miles or 8 light/minutes)-
- Then the distance of the nearest star (which equals 4.42 light years) would take an equivalent number of pages as would be in a stack of Bibles 71 feet high
- And the diameter of just our galaxy would be a stack of Bibles 310 miles high
- And we know of over 100 billion galaxies...

Now look ahead to next week [Genesis 1:16](#). On the 4th day of creation recorded in Genesis 1, the Word of God states that our creator spoke and the sun and moon appeared from nothing. One of the most amazing verses in the Bible is in v. 16 the last 5 words, "He made the stars also."

There are 100 Billion stars just in our Milky Way Galaxy. Among those many stars, our sun is an average 'yellow' star. It is in the middle as far as size, temperature and brightness. Just to give you a bit of perspective on some neighbors. In the Orion constellation there are two stars of note.

- Rigel is 15,000 times brighter than our sun, and thus hotter and so on.

- Antares is 36 million times bigger![2]

At the center, or core of our sun things are incredibly hot. The atoms stripped of their outer electrons are so densely packed it is absolutely dark and intensely hot. In fact, it is 16 million degrees centigrade. How hot is that? Well, a piece of the sun[3] the size of a pinhead that was in Oklahoma City -- would kill you here in your seat this morning because of the heat radiating from it! The energy radiated from the sun in one second is more than all the energy used on the earth since creation!

Have you thought about God lately? I mean, about how big and powerful He is? He is so much bigger than anything we are facing today is. He is infinitely more able to care for any difficulty than we are. Have you been still and experienced God?

Please turn to [Psalm 46:10](#), and read this verse.

Be still, and know that I am God; I will be exalted among the nations, I will be exalted in the earth! NKJV

Turn back with me to [Psalm 147:4-5](#)

He counts the number of the stars; He calls them all by name. Great is our Lord, and mighty in power; His understanding is infinite. GOD COUNTS AND CALLS THEM ALL!

Now [Psalm 8:1-3](#)

O Lord, our Lord, How excellent is Your name in all the earth, Who have set Your glory above the heavens! 3 When I consider Your heavens, the work of Your fingers, The moon and the stars, which You have ordained, 4 What is man that You are mindful of him, And the son of man that You visit him? NKJV

HAVE YOU EVER CONSIDERED HOW MUCH MATTER GOD MADE FROM NOTHING IN THIS UNIVERSE IS THAT WAS JUST A SNAP FOR GOD TO WHIP UP?

Scientific American 2/97 "Challenge of large numbers" p. 74- 78 "The size of atoms"

- The 19th century Italian chemist Ame-deo Avo-gardo represents the number of atoms in 12 grams of pure carbon.

- This amount is called a mole (6.02×10^{23}) and can be understood in the following way, if 1 gram (one piece of kid's cereal like Captain Crunch) of carbon was expanded to the size of the earth, a single carbon atom would be the size of a bowling ball.
- Another measure of a mole is to say that all the calculations of all computers from the 1st to the present, in all the world, added together would possibly equal the number of atoms in a mole (small computers can do millions per second and main frames far more).
- The total number of protons on the universe is 10^{80} .
- The evolutionary age of the universe is 10^{10} .

HAVE YOU EVER CONSIDERED HOW POWERFUL THIS UNIVERSE IS THAT WAS JUST A SNAP FOR GOD TO WHIP UP?

"Galactic Gushers" (p.26) are shining with the energy of a trillion suns, quasars are the brightest as well as the most distant known objects in the universe.

- They are now found to exist in "undisturbed" that is non-colliding galaxies and all (loud radio wave and quiet) being similar, pose a colossal problem.
- Why do they have fundamentally similar qualities?
- They are about the size of our solar system and seem at present to be the product of gasses being pulled into collapsed star black holes heated by the nearly speed of light slurping flow into the abyss.

HAVE YOU EVER CONSIDERED HOW VAST THIS UNIVERSE IS THAT WAS JUST A SNAP FOR GOD TO WHIP UP? "Ghostliest Galaxies" p. 56

- It was not until the 1980's that man's scientific observation skills were developed enough to detect the most numerous of all the known galaxies out there in the universe.
- Up to 1980 there were calculated to be about a billion of the 3 known types (elliptical, spiral and irregular) of galaxies.
- Spirals are including our own Milky Way having a pronounced bulge in their center.
- In other words half the population of the universe is made up of low-surface-brightness-galaxies.

- They are up to 20 times larger (galaxies measured in kilo-parsecs; a parsec is 3.26 light years; our Milky Way is 3 kilo-parsecs; the largest galaxy now Malin 1 is 20 times larger!) and less densely filled with stars, though in the same three patterns.
- Current explanation? Evolving slower and not mature yet!

- When a tree faced Him it wilted. **Mark 11:20-21** And in the morning, as they passed by, they saw the fig tree dried up from the roots. 21 And Peter calling to remembrance saith unto him, Master, behold, the fig tree which thou cursedst is withered away. (KJV)

- When the winds and waves of a fierce storm faced Him they fell silent. **Luke 8:24** And they came to him, and awoke him, saying, Master, master, we perish. Then he arose, and rebuked the wind

and the raging of the water: and they ceased, and there was a calm. (KJV)

- When the disciples met they bowed in worship!
- Moses face to ground
- Job repented
- Isaiah bowed
- Disciples in boat
- John on Patmos

What you believe about Genesis will determine your life, family, and ministry. Why?

If our children are not taught truth they can hold onto they will drift from the faith and shipwreck. Rom. 1.18

- So guard their schooling
- Shield their exposure to error and false teaching.
- Promote much exposure to the truth daily.
- Lead them by example to the Fellowship of Christ's Body - bring them to church!
- If a saintly hourly worker is of more value than a pagan doctor, lawyer, sport star, politician or business person - then guard and teach the truth. **Matthew 16:26** "For what profit is it to a man if he gains the whole world, and loses his own soul? Or what will a man give in exchange for his soul? (NKJV)

Their numbers are beyond estimation or calculation. Yet -

God made them **Genesis 1:16** And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: [he made] the stars also. (KJV) TRUST HIS POWER!

God names them **Psalms 147:4** He telleth the number of the stars; he calleth them all by [their] names. (KJV). TRUST HIS PLAN!

God sustains them **Colossians 1:17** And he is before all things, and by him all things consist. (KJV) TRUST HIS CARE!

And His Word has always said so! TRUST HIS WORD!

- So guard their schooling
- Shield their exposure to error and false teaching.
- Promote much exposure to the truth daily.
- Lead them by example to the Fellowship of Christ's Body - bring them to church!
- If a saintly hourly worker is of more value than a pagan doctor, lawyer, sport star, politician or business person - then guard and teach the truth. **Matthew 16:26** "For what profit is it to a man if he gains the whole world, and loses his own soul?
